

RELIABLE STORAGE FOR YOUR VACCINES

Norlake Scientific environmental rooms provide reliable, consistent storage for vaccines with precise control of humidity and temperature. Our rooms are also designed to fit many other treatment and diagnosis needs such as blood and plasma storage, sample storage and stability testing.

ENVIRO-LINE CUSTOM ROOMS

- Individually designed to suit specific storage and application requirements
- Modular construction for quick installation and relocation
- Available microprocessor controllers, alarms, monitors, temperature and humidity chart recorders, shelving, ramps, lighting, humidification and dehumidification

MINI ROOMS

- Standard sizes from 4' x 6' to 10' x 14'
- Single room or combination cold room/freezer models
- Rapid and easy installation
- Ceiling mount SciPak™ refrigeration system
- All refrigeration system components are located outside allowing more internal storage

LOGITEMP® PLUS ELECTRONIC CONTROLLER SYSTEM

LogiTemp Plus is standard on Mini Room refrigeration systems and is one of the many controller options available on Enviro-Line rooms.

- Track interior temperature history to ensure viability of vaccines
- Ensures optimum performance with precise control for functions including evaporator fans, room temperature, electronic expansion valve and defrost
- Safely monitor and control your system from your desktop, smartphone or tablet (when using optional router)
- System alerts, text messages and emails received on your phone, computer or tablet

LogiTemp Plus allows you to connect with your refrigeration system through a simple interface.

LogiTemp® Plus settings are accessible through a detachable tablet interface located on the front of the room. Operators may monitor and adjust refrigeration settings on site or remove the tablet and take with them for remote access.

System performance data may also be accessed from any other internet-connected device.
